

LIFESPAN COGNITION

Paid Research Opportunity!

Join our **online** research study to help us understand how people's thinking develops over time and across the lifespan.

We are looking for individuals between the ages of **10-15, 18-23, 40-45, and 65-70** years old. Parental/guardian consent is required for individuals 10-13.

Because this is an **ongoing, multi-year study**, we hope that if you choose to participate this year, you will return in following years.

Participants will receive a \$20 CAD gift card in the first year. Each subsequent year, this amount will increase by \$5!

To participate, visit **lifespancognition.com/participate**

KPU Lifespan Cognition Lab
